## CABLE FESTOON PRE-ASSEMBLED BY UNILIFT

UNILIFT cable festoons are working well in extreme conditions such as: high dustiness, high humidity, low temperature, chemically aggressive environment.

## CABLE FESTOON AFTER 7 YEARS OPERATION

In the photographs we present one of many cable festoons made by UNILIFT and destined to work on a clinker storage area of a well-known world leader in cement production.

After seven years of intensive use in extreme conditions, UNILIFT cable curtains work without failure.

Festoon includes the WK-R62 cable trolleys for flat cables.

Very high level of dustiness is a typical environmental condition for the machine operation in many cement plants.
